## SmartPuller AIR+

Autorobot®

*SmartPuller AIR+ is a new generation dent puller with a vacuum anchor. It includes an air-powered floor attachment, making the popular and patented SmartPuller an extremely versatile device for car dent pulling. The device is user-friendly, enabling fast and efficient work even in small spaces. It is easy to move around the car to the required position.*

*The vacuum anchor seal is better preserved when in the transport position (off the ground).*

The fastest body repair technique for small collision damages

SmartPuller AIR+ is specially designed to speed up the repair of minor collision damages. It allows repair work to be smoother and more efficient, saving time and effort.
